

## Poster List

- P01** Diffusion-controlled Reactions in Polyatomic Systems Based on Smoluchowski-like Equation  
*Kento Kasahara, Hirofumi Sato*
- P02** Active Site Opening Mechanism of an Olefin Polymerization Catalyst (pyridylamide)Hf(IV) Complex  
*Kentaro Matsumoto, Karakkattuparambil S. Sandhya, Masayoshi Takayanagi, Nobuaki Koga, Masataka Nagaoka*
- P03** Analysis about Oxidation of Amino Acid Residues with HOO· Radical  
*Yusuke Kawashima, Norihito Kawashita, Tatsuya Takagi, Katsuhisa Kitano*
- P04** Topologically Distinct Isomers of Water Clusters at Finite Temperature  
*Dai Akase, Misako Aida*
- P05** Mechanistic Study on the Active Site of the Asymmetric Hydrosilylation of Styrene with Helical Poly(quinoxaline-2,3-diyl) Chiral Phosphine Ligands  
*Manussada Ratanasak, Michinori Suginome, Jun-ya Hasegawa*
- P06** Multi-scale Dynamics of Ion Permeation through Potassium Channels  
*Takashi Sumikama, Shigetoshi Oiki*
- P07** A Molecular Dynamics Based Study of the Stabilization of Non-Watson-Crick Base Pairs, in Loop E, by Mg<sup>2+</sup> Ions and Hydration Site Network  
*Sudhanshu Shanker, Pradipta Bandyopadhyay*
- P08** Theoretical Study of a Coarse-grained Potential of Hydrophobic Interaction between Protein Molecules  
*Kazutomo Kawaguchi, Hidemi Nagao*
- P09** Alternative Role of Thrombin Sodium Ion-binding Cavity  
*Ikuo Kurisaki, Masayoshi Takayanagi, Chantal Barberot, Masataka Nagaoka*

- P10** Application of DFT+U with Magnetic Exchange Method to the Analysis of Redox and Magnetic Properties of Cathode Materials of Li-and Na-ion Batteries  
*Maxim Shishkin, Hirofumi Sato*
- P11** Additive Effect of Difluoroethylene Carbonate in Sodium-ion Batteries: Its Dual Roles in Solid Electrolyte Interphase Film Properties  
*Purushotham Uppula, Norio Takenaka, Masataka Nagaoka*
- P12** Development of a Method to Study the Electronic Structure of a Redox Species at the Electrode Interface  
*Yusuke Matsumi, Hiroshi Nakano, Hirofumi Sato*
- P13** Development of Hybrid MC/MD Reaction Method Combined with QM/MM Method: Application to Solid Electrolyte Interphase (SEI) Film Formation in Lithium-ion Batteries  
*Takuya Fujie, Norio Takenaka, Yuichi Suzuki, Masataka Nagaoka*
- P14** Quantitative Analysis of Site Energies and Their Fluctuations of Pigments in the Light-Harvesting Antenna  
*Masahiro Higashi, Shinji Saito*
- P15** A Chemical Bonding Analysis of Ion Conductive Materials  
*Taku Onishi*
- P16** Newly Discovered Low Band Gap Lead Iodide Perovskite Materials for Photovoltaic Solar Cells  
*Pradeep R. Varadwaj, Arpita Varadwaj, Koichi Yamashita*
- P17** Critical Role of Deep Hydrogen Tunneling to Accelerate the Antioxidant Reaction of Ubiquinol and Vitamin E  
*Taichi Inagaki, Takeshi Yamamoto*
- P18** Theoretical Study of the Effect of Molecular Vibrations on the Positron Binding to Polyatomic Molecules  
*Yukiumi Kita, Masanori Tachikawa*

- P19** Ab Initio Studies on the Photophysics of Uric Acid and Its Monohydrates  
*Shohei Yamazaki, Shu-hei Urashima, Hiroyuki Saigusa, Tetsuya Taketsugu*
- P20** Efficient Computational Algorithm of Vibrational Difference Spectra under Control of Temperature and Pressure  
*Tatsuya Joutsuka, Akihiro Morita*
- P21** Modeling Molecular Interactions in Halogen-bonding Cocrystal  
*Wataru Mizukami, Yuriko Aoki*
- P22** Theoretical Study on the Aromatic Polyamide Membrane Formation: Influence of Monomer Mixing Ratio on Membrane Nanostructure  
*Yuichi Suzuki, Yoshiyuki Koyano, Masataka Nagaoka*
